

**Camera Details and how to access the Premier Web camera system from your Phone or IPAD. Normal data rates cost may apply based on your phone data service plan.**

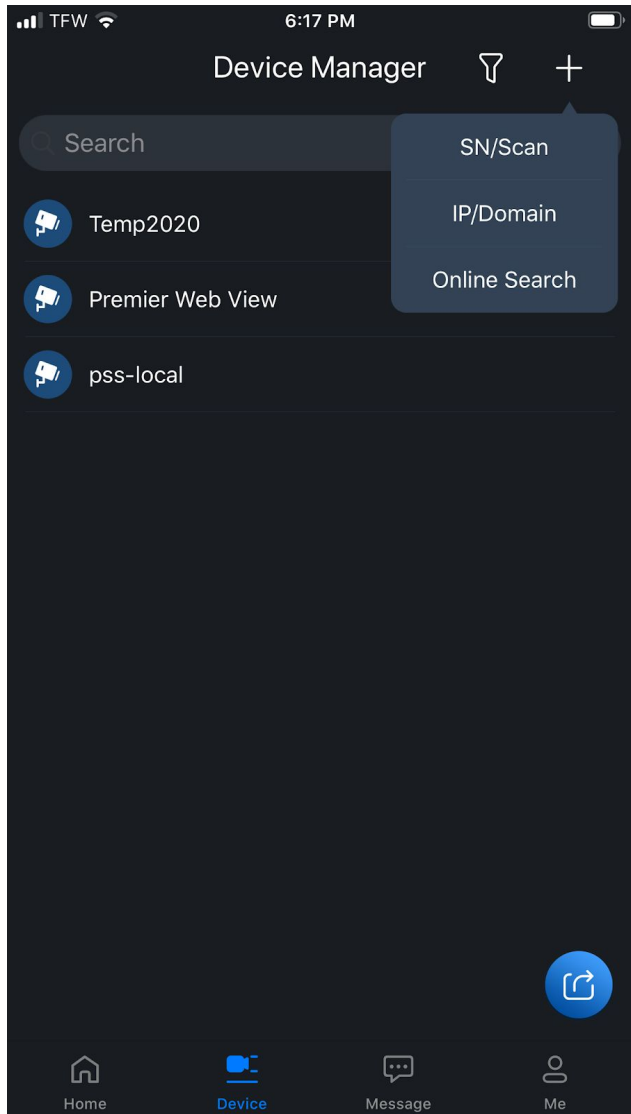

To Configure MontavueGo App to access our camera systems please follow these steps once you have downloaded the MontavueGo App.

Select "Device"

From the Device Manager Screen Select the **+** symbol in the upper right hand corner.

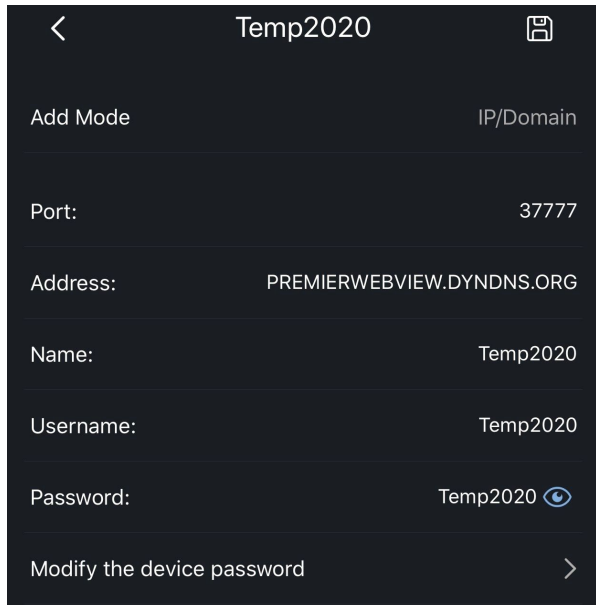

While on this screen please select

IP/Domain

While on this screen please select

NVR

On this screen you will fill in the following selections as noted below:

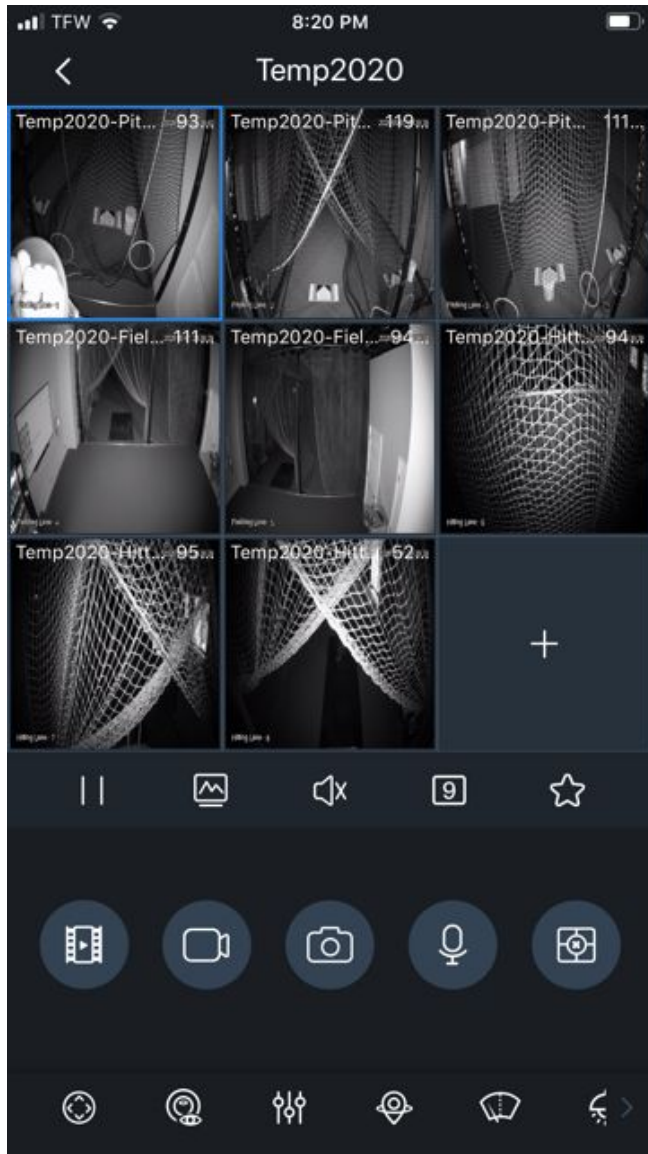

Port : 37777  
Address: PREMIERWEBVIEW.DYNDNS.ORG  
Name: Temp2020  
Username: Temp2020  
Password: Temp2020

Then hit the **“save”** icon in the upper right hand corner. This will save the setting and attempt to connect to our NVR camera system where you can view up to 8 separate camera systems.

On this screen you will see several controls. On this screen you are seeing 4 cameras.

If you hit the number 4 icon it will give you a selection for either 4 or 9 or 16 camera views. To view all 8 of our cameras you can select 9.

When on the camera view you can double click on any of the camera views and it will enlarge the specific camera. You can rotate your phone to the side and it will take the camera view to FULL screen.

You can also zoom in on the camera's view just like you do on a picture on your phone.

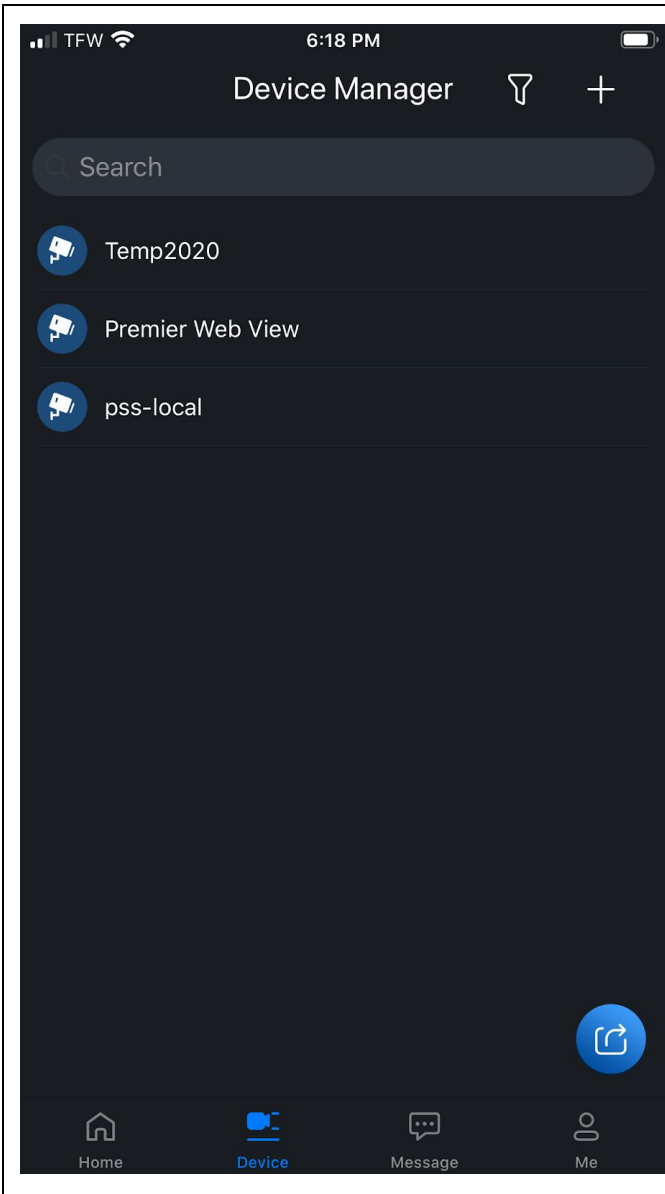

While on FULL Screen mode you can also swipe the screen to take you back and forth to different camera views of the different cages in the facility.

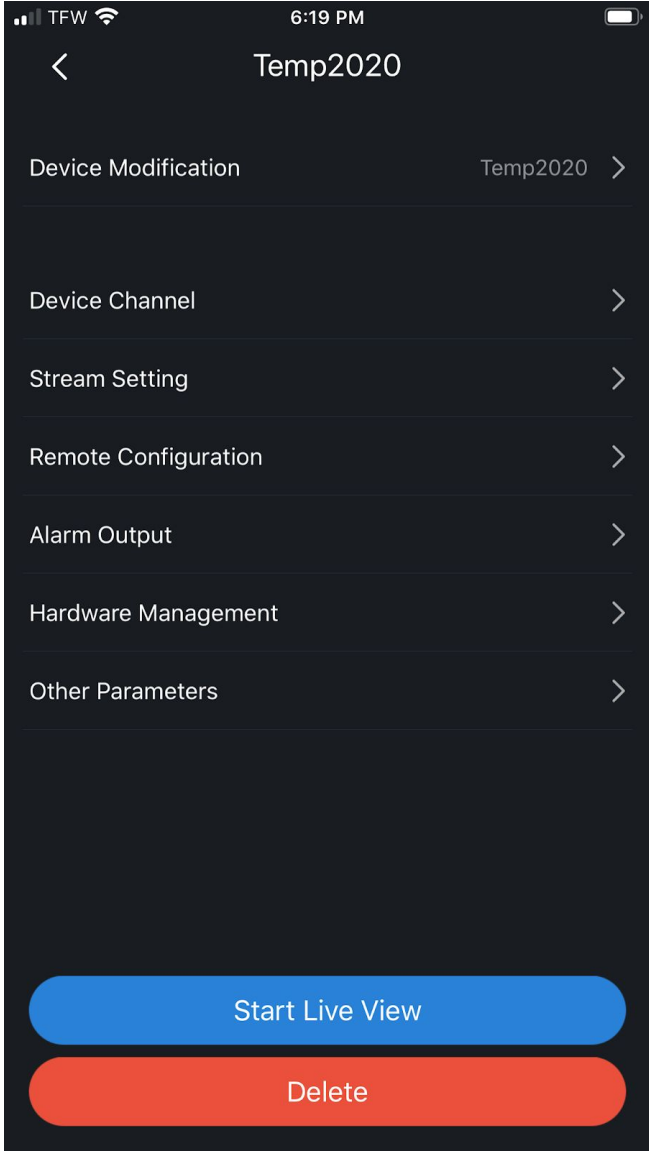

There are several controls that allow a lot of other functions such as snapshots, saving videos, etc.

For now, please just take advantage of the live viewing as the other services we generally charge for due to disk space, memory requirements, etc.

After you have connected successfully to the camera system once and your settings are saved the next time you return you can come to this screen and connect by choosing the settings you previously configured.

In this case it would be the "Temp2020" connection and it will take you to the next screen.

On this screen select "Start Live View"
