**Camera Details and how to access the Premier Fastpitch Academy Web camera system from your Phone or IPAD. Normal data rates may apply based on your phone data service plan. Access to the 8 camera system is something we generally charge for, but during the COVID-19 Pandemic we are offering this service to Premier students for free until further notice.**

	To Configure MontavueGo App to access our camera systems, please follow these steps once you have downloaded the MontavueGo App V2.2 Build Date 2020.09.02.

ABC   space   return
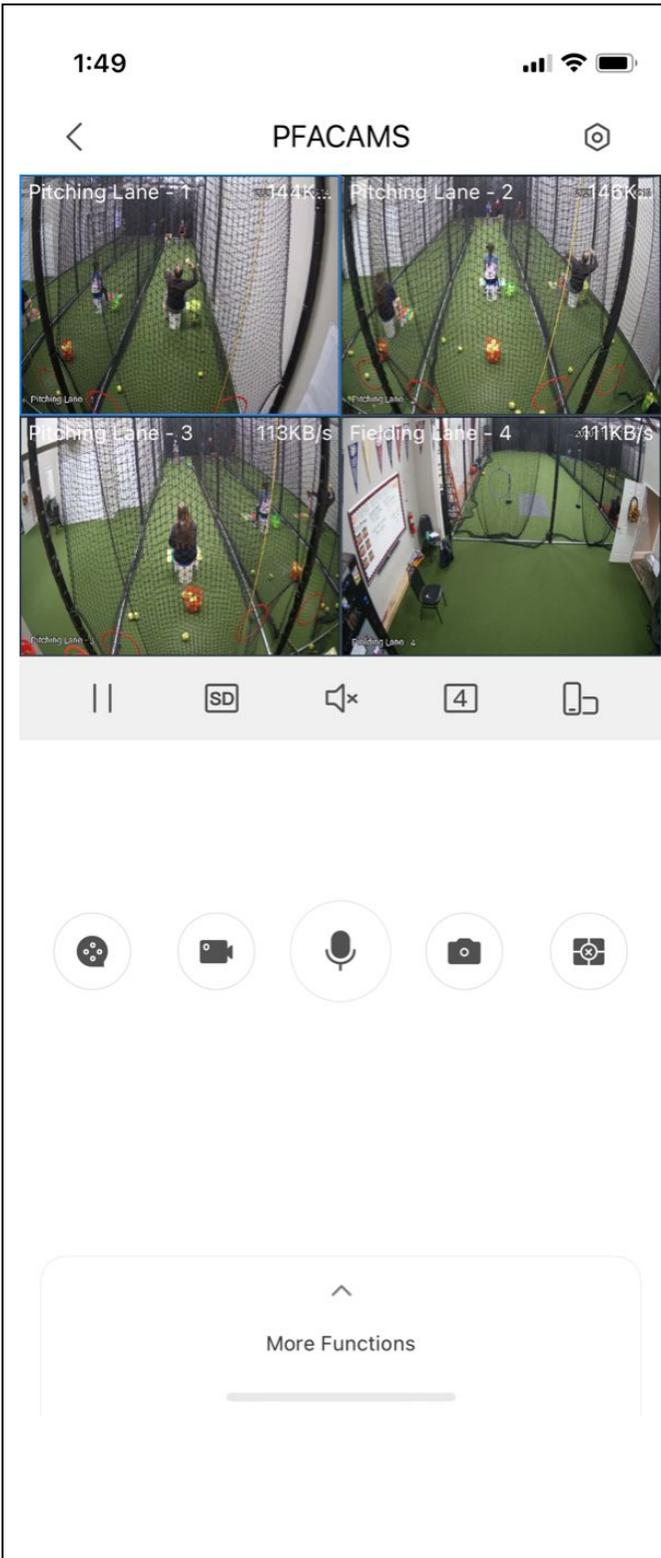

On this screen you will fill in the following selections as noted below:

Port : 37777
Address: PREMIERWEBVIEW.DYNDNS.ORG
Name: PFACAMS
Username: PFACAMS
Password: PFA-Cams! (password is case sensitive)

Then hit the **"save"** icon in the upper right hand corner. This will save the setting and attempt to connect to our NVR camera system where you can view up to 8 separate camera systems.
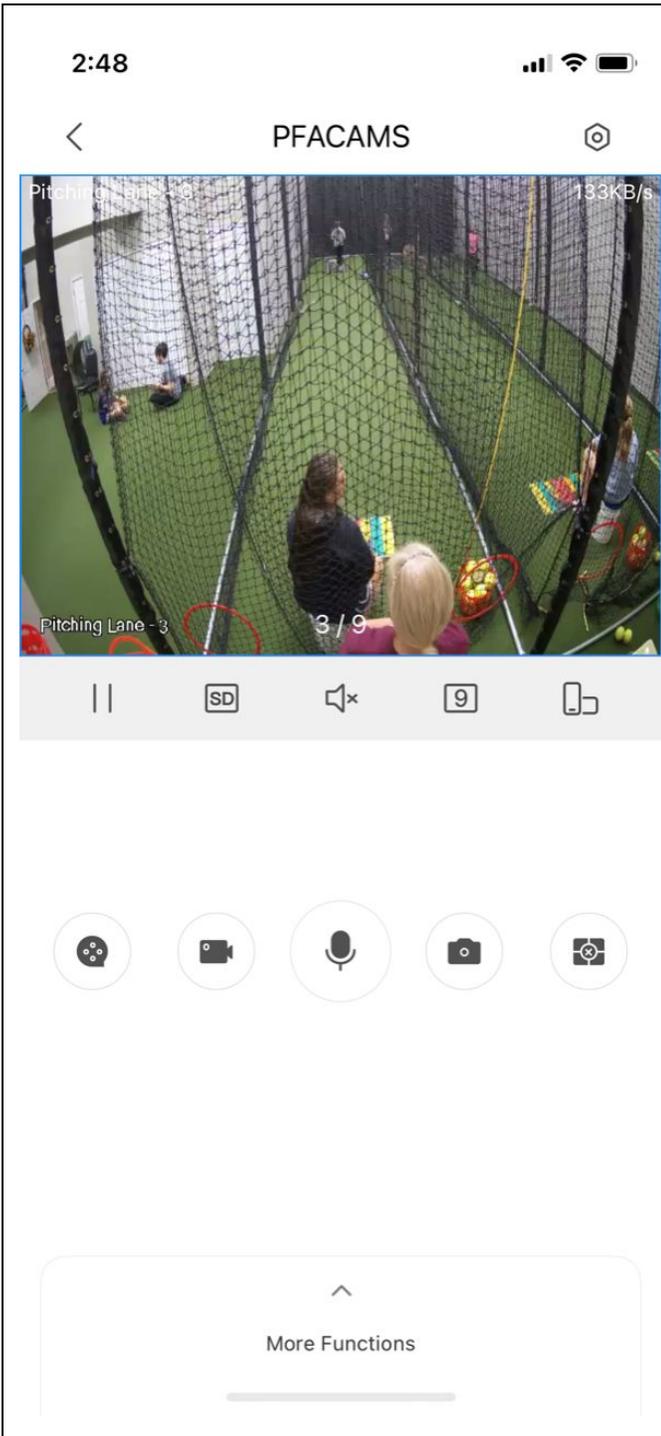

On this screen you will see several controls and four camera views.

If you hit the number [4] icon, it will give you a selection for either 4 or 9 or 16 camera views. To view all 8 of our cameras, you can select 9.
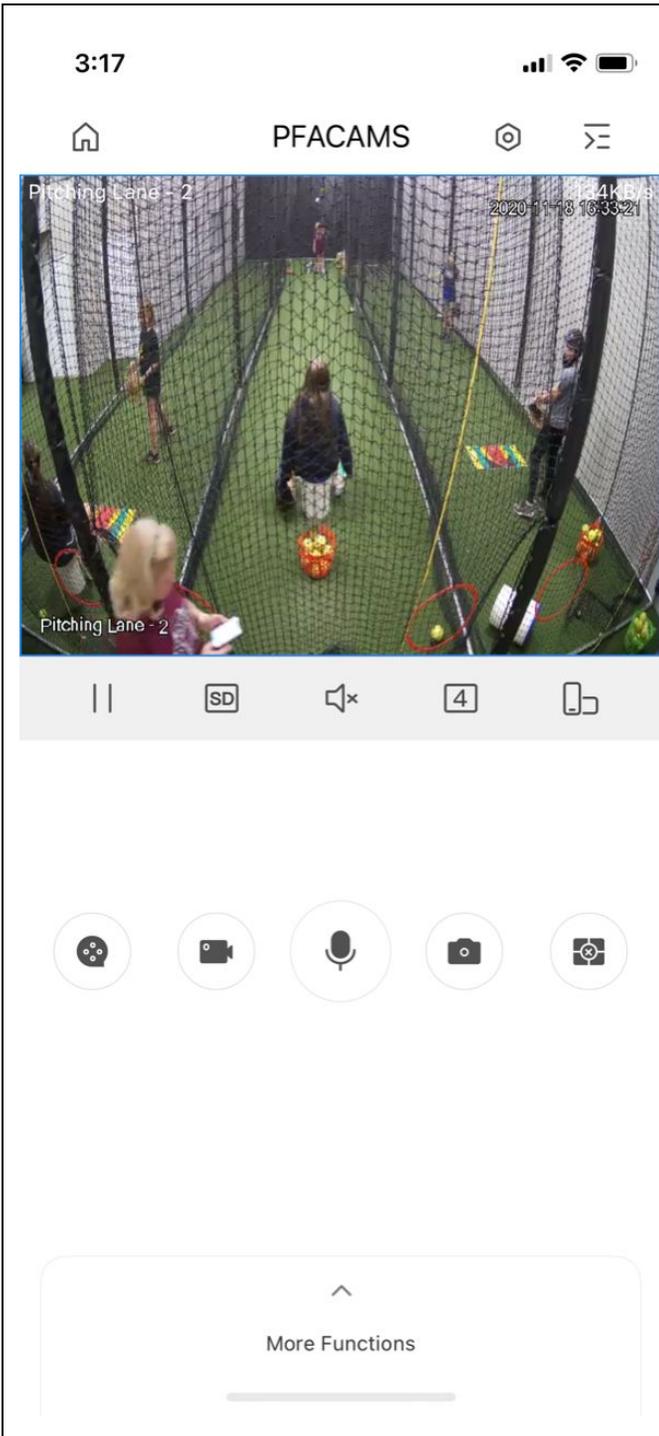

When on the camera view, you can double click on any of the camera views and it will enlarge that specific camera. You can rotate your phone to the side to view in FULL screen.

You can also zoom in on the camera's view just like you do on a picture or screen on your cell phone or IPAD..

While on FULL Screen mode you can also swipe the screen to take you back and forth to different camera views of the different cages in the facility.
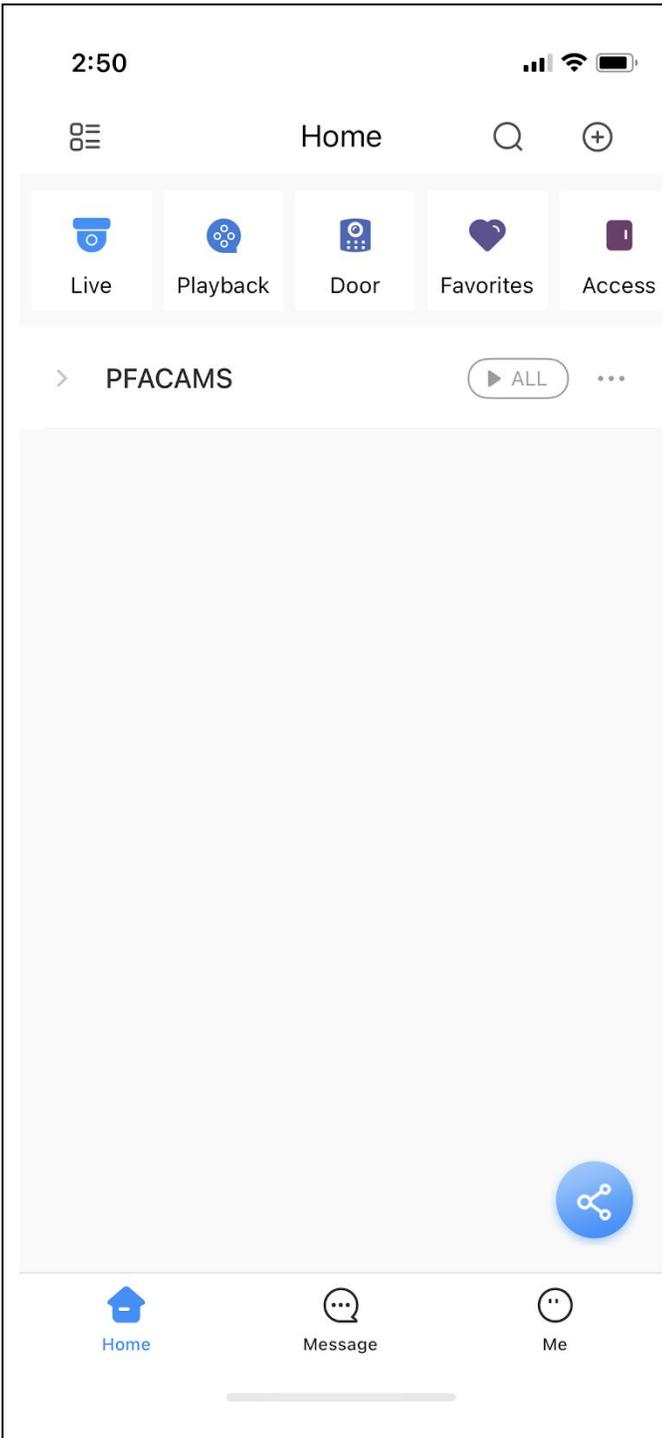

There are several controls that allow a lot of other functions such as snapshots, saving videos, etc.

For now, please just take advantage of the live viewing as the other services we generally charge for due to disk space, memory requirements, etc.

For a wider angle you can turn your phone sideways for a larger horizontal view. If the controls temporarily disappear from the screen you can tap the screen to have them reappear.

Home Message Me

After you have connected successfully to the camera system once and your settings are saved, the next time you return you can come to this screen and connect by choosing the settings you previously configured.

In this case it would be the "PFACAMS" connection.

By hitting the **ALL** button in that line it will bring up the cameras for viewing and the control buttons.
